NHS hospitals Whittington

Posts

Research interests Optimizing the surgical care of obese patients.

Key published papers Laparoscopic adjustable gastric banding: a 10-year single centre experience of 575 cases with weight loss following surgery.

Curcumin abrogates bile-induced NF- κ B activity and DNA damage in vitro and suppresses NF- κ B activity whilst promoting apoptosis in vivo, suggesting chemopreventative potential in Barrett's oesophagus.

In vitro and ex vivo models of extended reflux exposure demonstrate that weakly acidic mixed reflux heightens NF- κ B-mediated gene expression. Primary closure of choledochotomy after emergency laparoscopic common bile duct exploration.

The bile acid deoxycholic acid has a non-linear dose response for DNA damage and possibly NF- κ B activation in oesophageal cells, with a mechanism of action involving ROS.
