Paediatric Orthopaedic Surgeon

This specialty covers the diagnosis and treatment of a wide range of problems of the joints, bones, ligaments, tendons, muscles and nerves affecting babies, and children up to 18 years of age.

Orthopaedic surgery also covers treatment of fractures and soft tissue injuries.

Benefits of Children's orthopaedic surgery

We provide an extensive orthopaedic service, with experienced consultants and advanced equipment.

We have surgeons who practice across the treatment of children.

Conditions we treat include:
- foot and ankle conditions including Pes cavus, Pes valgus, and Pes planus
- hand deformities
- hip disorders such as: limping children, congenital hip dysplasia and pectus excavatum
- infections of the bone and joint
- knock knees
- bowed legs and slipped upper femoral epiphysis
- scoliosis and deformities including scoliosis

Following surgery

Your child can recover comfortably in our children-only Skyline Ward. Our 13 inpatient rooms are spacious and all have ensuite bathrooms, TV and DVD player, and WiFi. The Skyline playroom is bright and colourful with lots of toys and activities.

Many children also benefit from physiotherapy in our purpose-designed gym to help restore movement and function.

Please note that we do not provide a paediatric intensive care unit at Bupa Cromwell Hospital. However, any deteriorating child will be quickly assessed and stabilised by a Resident Medical Officer (RMO) trained in paediatric intensive care, supported by an on-call Paediatric Intensive Care Consultant, before being transferred to the most appropriate paediatric intensive care provider by the Children’s Acute Transport Service (CATS).
